ABOUT

LUXURY BUILT-IN

FINALLY A SMARTER CHOICE FOR GRILLING CENTERS

Broil King® gives you a new level of flexibility with the unique modular pod system. Broil King's Built-in series is a match of performance and luxury designed for the professional outdoor chef.

Utilize the pod system and add the Keg charcoal grill / smoker to create the ultimate outdoor grilling center. This series comes equipped with premium standout features like commercial-grade cast stainless steel cooking grids, a double-wall stainless steel cook box and patented stainless steel Dual-Tube™ burners.

Crafted with durable North American 304 grade stainless steel, the exterior is inspired by professional cooking appliances. Light up the night with back-lit control knobs and oven lights to instantly create the perfect ambiance at your next get together. Broil King®: the smart choice in outdoor grilling centers.

DESIGNED, ENGINEERED AND TESTED FOR GREAT BARBECUE FLAVOUR

Every Broil King® gas grill is designed and built to deliver great barbecue flavour. Broil King's Performance Grilling Technology (PGT) is a cooking system that is designed and engineered to vapourize food juices and deliver that great barbecue flavour every time you grill.

From the overall design of the cookbox, to the integration of how the cooking grids, Flav-r-Wave and burners work as a grilling system, Broil King® is a premium quality performance barbecue.

BUILT-IN ASSEMBLY HOW IT WORKS

Easy to assemble. Better to enjoy.

Simply choose your grill, burner, cabinets, outdoor kitchen accessories and countertop and you're on your way to creating your ultimate outdoor grilling center. The stainless steel cabinets come pre-assembled so all that is required is securing them together with a few fasteners.

Lift the cabinet onto the L-Bracket affixed to the adjoining bottom cabinet.

Latch the top L-Bracket from the adjoining cabinet over the cabinet and secure with screws.

PLANNING YOUR OUTDOOR KITCHEN

Find the ideal location

The first step in designing your outdoor grilling center is to survey the area. You need to determine how much space you can dedicate, then measure it. Make sure that your grilling paradise is close to accessible utilities. We recommend using at least 82 cm of clearance to ensure that you have plenty of room for food prep, cooking, serving, and entertaining.

Drawing your design on paper will help you understand where you need to position things so you can get the best possible experience for you and your guests.

DETERMINE YOUR NEEDS

Entertaining Area

How much space do you have to work with on your deck or patio?

Location

Will your outdoor grilling center be against a wall or free-standing? Are there any fire risks in the area?

Water

Do you require running water? Hot and Cold? How far away is outdoor plumbing from the grilling center?

Drainage

Are you going to use the waste water system in your home? French drain or dry well? Bucket or yard drainage?

Winterizing Shut-Offs

Do you need to winterize? Where are the shut-off valves located?

Gas

Do you need to have a line installed for natural gas or are you using a propane tank?

Electrical

Where are the outlets located? Do you have the proper amperage requirements?

Shelter from the Elements

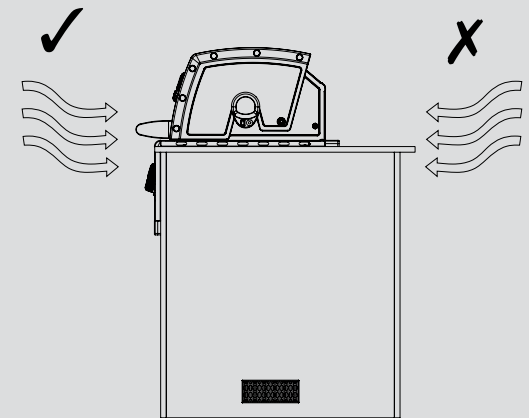

Do you need to plant trees or install awnings/ pergola to provide shade? Direction of the wind for blowing smoke?

Lighting

Where does the sun rise and set in your location? Do you need lighting around or to and from the grilling center?

Positioning the Grilling Center

Make sure to position the grill facing the wind. This will assist in venting hot air through the back of the grill.

Correct position

Assists in venting hot air through the back of the grill.

Incorrect position

Disrupts airflow and reduces performance.

Please refer to the Built-In Owner's Manual for a complete guide on safety and installation.

Planning.

Using your space effectively.

Once you've determined the ideal spot for your built-in grill, decide on the size and type of grill that will be installed. The Broil King® Keg is an easy addition to any outdoor kitchen if you are looking for a Kamado-style charcoal grill. Consider any cabinet features you would like to incorporate more storage, refrigeration or dish- Consider how each appliance and cabinet will fit into the overall design, how much room to allow for each, and how they will 'flow' into each other. Having a sink and prep station nearby is good for effective food preparation and service. Also consider the seating required for guests while entertaining.

Think about grilling in all seasons.

Grilling while enjoying the sunshine is the best scenario, but having some shade to dine in can be a blessing in some locations. Incorporating a tall roof or pergola over your outdoor kitchen will allow you to enjoy cooking outdoors in all weather, and extend the seasonal opportunities of your space. If you live in a warm-climate, you may want to include an overhead fan to keep you cool on hot summer days and to keep mosquitoes at bay. If you plan on using your outdoor kitchen during the cold weather months, consider leaving space for heat lamps, a fireplace, or a roof with a built-in exhaust hood. See the Owner's Manual for exhaust installation.

The final touches.

Your outdoor grilling center is designed for you and your guests to enjoy the outdoors while having the comforts of an indoor living space. Make sure to include features that will blend with the look and feel of your home. Adding chairs to your grilling center creates a focal point when entertaining. Decorative lighting enhances the experience at night along with propane heaters to keep your guests comfortable. Choose durable outdoor furniture with comfortable cushions. Select a table for your space for dining or as a buffet.

DIY or expert installation.

Consider what you are capable of by yourself. Simple installations involving propane fueled grills and minor landscaping might be attainable on your own. If your grilling center involves natural gas lines, electricity, water and major landscaping, it's best to hire professionals that know all of the necessary building codes and safety regulations.
